

## **LOGIN / REGISTER**

~ When opening the app you will be prompted to select between the login screen and register window.

-> For the register windows you will have to enter a username and a password that's not already used ( a warning will appear in that case)

- > For the login screen enter your personal login details
- > The app checks the details
- > Based on your role you will be designated to your interface with different actions.
  - After 5 wrong inputs for your login details you will be redirected to the register screen.

## **INTERACTION FOR THE ROLES**

~ Loggin in as Manager you will have the following available actions: see the whole stock; have the list in order with the ones with the lowest stock;

~ Loggin in as Bartender you will have the following available actions: Place drink orders ( which will automatically elimate products from the stock ); add new drink recipes on the menu;

~ Loggin in as Chef you will have the following available actions: Place food orders ( which will automatically elimate products from the stock ); add new dishes recipes on the menu;
